

(project)

funding organisation

start:-
15 to 18/06/2021

Presented by K. Mounika (my owner)
K. Uday

deadline

* Mainly to develop this project different poor

Categories of students and also others.

* The three languages we will use to develop the organisation. These are HTML, CSS, JavaScript

* Today i start html login page. this is organised by developers. That's why i thought and implement the login page for devoper.

* And different animations to use for login page.

→ The imgContainer is used to cancel mark in the login above page.

The animations i taken the Spectrum. The sum of colors also i referred in the spectrum.

The html login page Completed.

* Now i thought small description and login details.

In this i added small image is BackT.jpg

The names is I am uday Kadiru or mounika Kamepalli.

The positions are dynamically i given. These are position: relative; and next image importance is.

background-img: no-repeat;

* Now i start different login persons. There are student, teacher, parents. → have village

↙ The each person have some Credentials.

entername, college, phonenumber, email, fund-amount,

In this images are student.jpg gender,
teacher.jpg subjects,
parent.jpg field.

⇒ This is enough with my knowledge and i will talk to my owner and take next decisions

date: 22-06-2021

* Unexpectedly me and my owner to think different and add new things to project.

The very long discussions after i thought new working environment for project

(*) Today i very happy. I have talk to my owner in phone call and explains various attributes and new things.

⇒ The owner says the fund details to know i entered or not. This is simply connecting details page and coming persons login page. Now we can add new page.

That page i put submit link and contact us page.

Now i thought one home page is better to see the website.

* Actually above point saying my owner. I also interested to put that.

This time i will research in various source codes and various youtube projects.

→ Now i selected one. This is good to me and my owner. And also unexpectedly to changed project name. It is Helping hands.

I put one Gif in background is 3.GIF

Date: 24-06-2015

* Today very bad now also discussions are very bad.

→ my owner says to add database is better. why means the details to see in that database

* That the time i shock and i have an idea to implement the database to php queries.

* I take reference and i wrote code for different submission persons.

details — entry1.php (student)

" 2.php (parent)

" 3.php (teacher)

Now i talk to my owner.....

TH. SHE says the very big process and not solve in this time. And also she thought after expo date to done this process.

date: 26-06-2021

* Anyway expo date is comes now.

→ today i will explain total code to my owner

→ I encouraged to my owner

→ And what mistakes she has no repeat in project explanation time (this type of thing i will discuss in phone call 7:30)

Very bad my owner is self preparation; I angry. I scold my owner. she has disturbed to me. But my experience very worst in this situation.

Anycoay i called to her. And he explains project and encouraged. she has happy. I happy.

* After phone call i will tell some of things to share with my owner.

* But my owner thoughts are very low. She thought i will do job. I disappointed But i encourage my owner.

I will help you

date - 27-06-2021

→ I thought my source code with our owner permission i uploaded to my github pages.

The github pages is the following repositories.

This is my project file names.

1. homepage.html

2. contactus.html

3. About.html

4. Signup.html

5. Student.html

6. Teacher.html

7. parent.html

8. details-entry1.php

9. " " 2.php

10. " " 3.php.
